<p>STATUS: The A.O. Smith (Westinghouse) site is located on Westinghouse Road less than one half mile west of Union City. Westinghouse operated a small motor manufacturing plant at this site from 1950 to 1986. A.O. Smith purchased the facility in 1986. Westinghouse repurchased the facility in January 1987.</p> <p>Hydraulic mechanics employed in the manufacturing process used various lubricating oils containing PCBs. Investigations conducted by IDEM to date indicate that PCBs from the former Westinghouse operations have impacted the Little Mississinewa River.</p> <p>IDEM, the United States Environmental Protection Agency, and representatives from A.O. Smith are currently in negotiations for the cleanup.</p>
